EXPERIENCE 4 OPT-IN INSTRUCTIONS

You must opt in to the update on your main TiVo DVR first. After the update is complete, you can then update any TiVo® Mini devices in your home.

1. Press the TiVo button on your remote.
2. Go to the Apps section, and select Get New Experience.
3. Select Upgrade Now to opt in.
4. Press Continue to upgrade and follow the prompts to confirm.
5. Press Live TV to continue watching TV. Your TiVo DVR will complete the update overnight when you’re not using your DR.

If you’d like to complete the update immediately, follow the below steps to manually reboot your equipment.

1. After opting in, press the TiVo button on your remote.
2. Go to Menu.
4. Choose Help and then Restart Box. The reboot will take about 30 minutes to complete.

Please allow up to 24 hours after updating your TiVo DVR for the new experience to completely load on your device. Once your main TiVo DVR is updated, follow the on-screen prompts or repeat the above steps on any TiVo Mini in your home to upgrade that equipment as well.
